ESSROC did the calculations with biomass- and determined that the PSD will not apply—the e-mail follows this one--

HQ plans to provide some guidance by mid-September- FYI.

In the meantime, please check this---will GHG emissions change caused by this biomass use in the kiln make it subject to PSD?

Umesh,  
Hi.

Recently the court vacated the deferral for GHG from biogenic sources. Back in April 2013, Essroc obtained a PSD non applicability determination for the use of biomass in the cement kiln. Essroc is in the process of obtaining the EQB air construction permit for the use of biomass in the kiln. Does this decision will affect the non PSD applicability for the use

of biomass at the kiln? Is EPA had made a decision or published guidance on how sources which rely on the deferral for permitting purposes (PSD, NSR) will be treated or affected?

Thanks for your help.

Angel

Hi! Angel:

The PSD non-app conditions that will go along with ESSROC's PSD non-app for using biomass is attached here for you to take a look at and comment on its accuracy. This is a courtesy review of my draft. Please respond as soon as you can- I plan to finalize this early next week.

Thanks.
